Chicago Based Music Magazine Est. 2002

ANDREW WK

Who Knows? Live in Concert 2000-2004

MVD

I was lucky enough to have the opportunity to see Andrew WK live right in the middle of him blowing up in the mainstream and I never thought that a DVD could quite capture what a show with him and his band was like in person, but this one comes pretty close. Is he a good musician or are they even that good of a band? Well the answer is simply no, but they are supposed to be fun and witnessing this live is supposed to be like a party and this DVD is. This isn't for someone looking to pick apart a musician and tell you all of the bad things, this and Andrew WK is simply for people just looking to kick back and party a little bit and free yourself of any worries you may have in your life and no one does it better than them. Like WK describes his fans on this DVD "We don't have fans we have friends" and that's why I love him. It's nice to see someone that doesn't take anything for granted. This is fun music and a fun guy and I am glad that I have this DVD. The next time I have a bad day at work, which let's face it is more often then not I can release my frustrations with a party led by Andrew WK! (JK)
