Posted in [DVD Reviews](#) on August 13th, 2007

Have you ever seen something like a car crash or a train wreck, and you couldn't look away? Well get ready for a disturbing, grotesque and downright crazy look at one of punk's most notorious front men. **Hated** is a documentary that takes you inside the head of GG Allin and chronicles his last days on earth.

GG Allin set the bar for excess and political incorrectness. This special edition documentary from filmmaker Todd Phillips (**Road Trip** and **Old School**) takes you into the bowels of the punk scene and exposes one of it's legends. This film truly uncovers the madness behind GG's actions and exposes him (no pun intended) and what he stood for.

Imagine "Cops" on speed and that will give you a brief idea of what this film is about. From defecation to bloody skulls, **Hated** gives you a no holds bar look into the life that once was GG Allin's. This film is a must for punk and metal fans alike. It truly shows the darker side of Rock n Roll.

**Ragman** - *No more franks and beans, I beg you!!!!!!*
