

EINSTUERZENDE NEUBAUTEN

Palast Der Republik DVD

(MVD)

This to me was just a wall of industrial noise. I am not an expert on this style of music, but this was just plain awful. A bunch of guys just making a bunch of noise with no purpose at all. The songs had no direction, the singing was just a bunch of mumbo jumbo as well. I like some industrial (Nine Inch Nails, Ministry, Godflesh), but this was just to my ears a bunch of noise that dulled my ears and was very, very forgettable Info: <http://www.mvdb2b.com>
