Schenker Barden Acoustic Project - Gypsy Lady – Inakustik

Schenker Barden Acoustic Project - Gypsy Lady – Inakustik

At this stage of Michael's career he has nothing left to prove but yet he still has much left to release. With this repairing of Schenker and Gary Barden to create Gypsy Lady they have given us an amazingly pleasant listening experience with stunning acoustics. Twelve tracks come at you with Gary's soothing vocals sweeping over them like a breeze on the ocean. I always liked Gary's vocals on the old MSG records and with this he sounds like an aged Geoff Tate which adds a different dimension to Michael's acoustics. "Lost" and "Dance Lady Gypsy" are possibly the best stuff that has hit a Schenker CD in awhile. His intricate picking is deft and the song creation is superb. But then you knew that anyway, it is Michael Schenker and he does not disappoint his lethal following. What Gypsy Lady brings you is twelve perfect acoustic based tracks that shows a long time rock guitarist still in his prime and still willing to deliver for his fans. Gary Barden adds an amazing amount to the proceedings and this CD will be long remembered.
