Seven Tracks in Seven Days by Sunshine Jones

(King Street Sounds)

Sunshine Jones is the veteran front man of the now defunct, live sound system crew Dubtribe Sound System. On his debut solo album, Sunshine's goal was to simplify. He produced each track within 24 hours without a computer and using a maximum of four pieces of equipment, notably the Roland classics: 909, 303, Juno-60, an Akai sampler, and other assorted elements. His minimal approach yields seven elegantly simple, deeply emotional, and serenely psychedelic songs all mixed together with aplomb!
