RETRIBUTION/Made In Hell (Metal Mind Productions) This is some decent death metal that some nice hooks and at least stays away from all the generic riffing and playing. The band are a more modern death metal band and have a touch of groove to their style, but they also have some melody and this is not an all out assault. The riffs will have necks moving and pits forming and the production is thick and heavy and the melodic vocals may turn off some, but I thought this band has a perfect mix of death metal and melody.
