

SHELTER/Beyond Planet Earth (Metal Mind Productions) This was band that Ray from Youth of Today formed and this was kind of a wimpy release in my eyes. Gone is the aggression and extreme music and it replaced with almost poppy punk that almost had me gagging. This wouldn't be out of spot on some college radio station. There is no metal and it is more college rock and I don't think many of you would like this. I know I didn't. Info:
