

Anderson, Bruford, Wakeman, Howe (MVD DVD reissue) has been out of print for a while and the prices for used copies have exceed \$100! This was made when the original band members had a falling out with Chris Squire and recorded the album of the same title. It was my least favorite album release of all involved and this concert is very much out of its element. This was just an odd period for all and the film here captures the awkwardness it all.
